

Date: 4/2/2024 Author: Gordon Lyons Project: 14175 CR 7 TCP#1

Comments:

1. The posted speed limit is 45 mph. Tapers for lane closure shall conform to MUTCD standard.
2. Tangent device spacing for lane closures shall not exceed double the posted speed limit.
3. Temporary Traffic Control will operate under daytime hours only. Devices must be picked up before 3:30PM. In emergency situations where work enters night time hours, and flaggers are present, light towers must be used.
4. If a 3rd party Traffic Control Company is providing TTC service, they must possess proper credentials before operations can begin. Flaggers must possess a Flagger Certification.
5. A UTC must be present in work areas that require flaggers within the limits of a lighted intersection.
6. Any TTC within 200ft of a bus station must notify RTD 3 days prior to work.
7. Per MUTCD standard TCS has the ability to make field adjustments to TCP to accommodate for road/traffic conditions.
